- Urdu

WORK EXPERIENCE

Trillo Tourist Guide [Internship at YoursOwn Insticram Systems Pvt. Ltd.]
- During this internship we designed UI of Tourist guide from desktop view to mobile view.
- Technologies used – HTML, SCSS and Bootstrap. GitHub

PROJECTS

Connect Coder [Android][Continuing]
- The main objective of Connect Coder app is to help coders to communicate and share their thoughts with the coding community, gain knowledge and share trending technologies.
- This application will help a lot of coders to share, ask and resolve their problem at earliest possible.
- Users can communicate through direct message, post their codes, in code hub section and also search specific profession.
- This app is designed using Kotlin, XML and Firebase.

Newsly [Android]
- It's an android app designed using xml and kotlin. Throgh this app users can read latest news. Here I have used API call from newsapi.org. GitHub

Library Management System [Web]
- Library Management system was designed to automate the library work in our college.
- In this project we created two sides One is librarian side and another is user side. Admin can maintain all the record like adding books, issue books, maintain all users record, etc.
- After registration user can search for books, request for issue, return books etc. GitHub

Sales and Stock Management [Web]
- The project is designed for small to big shops to manage their inventories.
- Some features of this project are user can maintain their stocks, sales and can also generate report in any format like pdf or excel.
- Technologies used – HTML, CSS, Bootstrap, PHP and MySQL.
